STEEL HOMES & BARNDOMINIUMS

MAKE ROOM FOR YOUR LIFE.

HOMES / BARNDOMINIUMS / HOME + SHOP

A welcoming home. A place for your projects. A porch to enjoy the view. Start with a custom steel building kit shaped around the way you want to live.

MORE WAYS TO MAKE IT YOURS.

STYLE BUILT AROUND YOU.

LIVING. WORKING. RELAXING.

Plan a space that feels like home.

Explore garage space, open living areas and covered porches in a steel home designed around your plans.

YOUR HOME. YOUR SHOP. YOUR WAY.

LIVE. WORK. UNWIND.

CUSTOM HOMES / GARAGES / WORKSHOPS

Plan your home, garage and workshop around the way you live. Customize the layout, roof style, doors, windows and porch with an American-made steel building kit, shipped factory direct.

ROOM FOR YOUR NEXT PROJECT.

Make space for your hobbies

Create a place for vehicles, tools, collections and weekend projects. Pair your home with an attached or separate garage or workshop.

Plan comfortable access

Start with vehicle dimensions, door openings and the room needed to move around. Leave space for workbenches and organized storage.

Bring the property together

Coordinate siding, roof colors, doors and trim with your home. A thoughtful design helps every building feel part of the same property.

MAKE THE LOOK YOUR OWN.

Choose a style that suits your property and the way you want to live.

Set the color palette

Coordinate steel wall panels, roofing, trim and wainscoting. Bring together the colors that give your home its character.

Shape the roofline

Explore gable, gambrel and other roof profiles. Match the building proportions to your rooms, outdoor spaces and preferred style.

Choose the details

Plan window placement, entry doors and exterior accents together. Small details help the whole design feel complete.

STRENGTH STARTS WITH THE FRAME.

Begin with your building

Share your intended use, dimensions, major openings and site location. Work with SCC to coordinate the building package with your home and shop plans.

Put the details in place

Review roof and wall options, doors, windows, insulation and ventilation. Confirm the frame and engineering requirements before finalizing your kit.

Prepare for the next steps

Align the building design with your foundation and site plan. Coordinate permits, delivery, unloading and assembly with the professionals handling your project.

FROM YOUR IDEAS TO YOUR HOME.

Share your vision

Bring your project location, approximate dimensions and preferred schedule. Tell us about your living space, garage, porch and the details that matter most.

Refine the package

Discuss the layout, frame, colors, doors and windows with an SCC specialist. Review the quoted components and options so you know what your building kit includes.

Plan the finished project

Coordinate the foundation, erection, utilities and interior finishes with your project team. Connect the building delivery schedule to your site readiness.

AMERICAN-MADE. FACTORY-DIRECT. A custom building package for the home and shop you have in mind.

A HOME THAT FEELS LIKE YOURS.

Start with how you live

Think about the spaces you use every day: a welcoming kitchen, a comfortable living area, private bedrooms and practical storage. Let your routine guide the layout.

Bring your style home

A farmhouse porch, a classic barn profile or clean modern lines can all shape your finished home. Choose the roof, windows, colors and details that feel right to you.

Enjoy the space outside

Plan a porch, patio or covered gathering area alongside your living space. Consider the views, shade and entrances that make outdoor time part of everyday life.

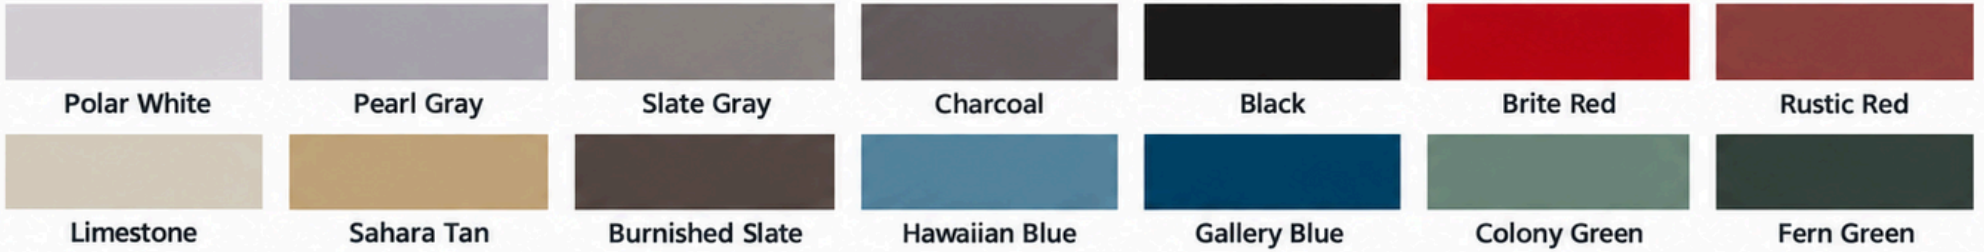

YOUR HOME. YOUR CHARACTER.

Personal spaces and inviting porches, planned around your life.
